

The 276th Food safety Group (FSG) meeting

Item and Contact Information

Item Establishment of residue standards of Pesticides, Animal Feed Additives and Veterinary Drugs in Foods

- Pesticides: Chlorantraniliprole, 1,3-Dichloropropene, Fenazaquin,
Thiobencarb, Tiadinil

See the “*MRL table*” for details of **the draft standards** on each chemical.

The Food Sanitation Act authorizes the *Prime Minister* to establish residue standards for pesticides, feed additives, and veterinary drugs, hereafter referred to as “agricultural chemicals”, in or on certain food commodities. Any food for which standards are established pursuant to the provisions in Article 13, Paragraph 1 of the act is not permitted to be marketed in Japan unless it complies with the established standards.

On May 29, 2006, Japan introduced the Positive List System* for agricultural chemicals in food. All foods distributed in the Japanese marketplace are subject to the system.

At this meeting, the Consumer Affairs Agency (CAA) would like to inform you of the proposals to modify or newly set the standards: maximum residue limits (MRLs) of the agricultural chemicals listed above for certain commodities under the Food Sanitation Act.

*, The aim of the positive list system on “agricultural chemicals” prohibits the distribution of any foods containing agricultural chemicals in amounts exceeding a uniform limit of 0.01 ppm generally considered to have no damage on human health in the Japanese marketplace, unless specific MRLs have been set.

<The procedure for submitting comments for Items>

The CAA will amend the existing standards and specifications for food as shown in this document. In case of any comments or queries, please inform *the contact person* via email or post in writing in Japanese or English by Wednesday, **SEP 09**.

After the designated date above, it is necessary to submit comments to the enquiring point following the WTO/SPS Agreement (*).

If you wish to request Japan to adopt the same limits as your country's MRLs, you are asked to submit data supporting your country's MRLs, such as a risk assessment and residue data.

* Among the agricultural chemicals subject to this revision, notifications to the WTO for chlorantraniliprole and thiobencarb have already been submitted. While certain maximum residue limits have been revised as a result of those notifications, no further WTO notification is planned at this time.
